DETAILED ACTION

Claim Objections

1. Claim 17 is objected to because of the following informalities: in line 6, --is—should be added before “coupled”. Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 2-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claims 2 and 3, line 1, “the connector” is without proper antecedent basis. Apparently this term should be —adaptor—to be accurate.

Allowable Subject Matter

4. Claims 1, 4-19 are allowed.
5. Claims 2-3 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Wahl, Paugh and Craine are cited to show various tethering devices. However none of the prior art devices disclose all the elements claimed in the dependent claims, including the adaptor coupled to the protuberance and having a main body with first and second portions separated by a partition or wall with the first portion defining a bore and the second portion defining a second bore of tapered or funnel-shaped configuration.
